DETAILED ACTION

Current Status

1. Claims 18-25 are pending in the application.

Priority

Applicants' claim for domestic priority under 35 U.S.C. 119(e) is acknowledged.

Allowed Claims

Claims 18-25 are allowable over the prior art of record.

Reason For Allowance

The following is an examiner's statement of reasons for allowance: A search of the prior art failed to uncover any reference that anticipates or renders obvious a method for the preparation of an inorganic boranophosphate salt of the general formula 2 as claimed by applicants.

formula 2

The closest prior arts are Sood et al., {Boron analogs of phosphonoacetates: synthesis, characterization and antitumor properties of sodium diethyl phosphite-carboxyborane and related compounds, Tetrahedron (1991), 47(34), 6915-6930}. Sood et al. teach a process for ethylphosphite-cyanoborane, bis(tributylammonium) salt by reacting diethylphosphite-cyanoborane with Me₃SiI in CH₂Cl₂/water to give ethylphosphite-cyanoborane. Ethylphosphite-cyanoborane produced was then reacted

with Bu_3N at 0°C to give ethylphosphite-cyanoborane, bis(tributylammonium) salt while applicants claim a process comprising reacting tris(trimethylsilyl)-phosphite with borane-dimethylsulfide complex of the formula $\text{BH}_3\cdot\text{SMe}_2$, in dry acetonitrile under inert gas, and treating the formed intermediate with the suitable base MOH in water or methanol, thus obtaining the desired salt. These are two different processes with different starting materials and end product. The difference is not readily apparent and would not have been suggested to one of ordinary skill.

All claims (18-25) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
